

Expanded Polystyrene

EPS Recycling Network

The National EPS Collection Network has been established in conjunction with the Plastics & Chemical Industries Association (PACIA) and Recycling Expanded Polystyrene Australia (REPSA).

- ▲ All EPS is accepted at the collection centres providing it is clean and free of contaminants
- ▲ EPS is a versatile plastic that is very easy to recycle and the recycling network guarantees all EPS collected at the centres will be re-used or recycled
- ▲ Produce boxes are accepted free of charge
- ▲ A service fee does apply to other products from the building and packaging sectors
- ▲ Contact the REPSA office or the centre operator for further information
